

Aerial Work Platforms

Aerial Work Platforms - There are different lift truck accessories offered on the market. They could help transform your lift truck so that you could expand your ability to pick things up or complete clean up tasks and material handling with greater ease.

Several accessories were particularly designed for the forks themselves. For example, blade extensions are utilized when you require more blade length, that increases lifting capacity. Fork extensions come in lengths ranging from 48-120 inches. Rounded or triangular attachments are one more variety used whenever transporting rolled material so as to make certain it does not roll off of the typical flat forks.

Lifting accessories can be pivoting and telescoping crane accessories. They are available in various kinds. These attachments are usually used for transferring metal bars, poles, lumber or whatever type of bulky things. Additional attachments such as various kinds of hooks and hook plates are available in order to lift items using a chain or sling. Magnetic lifters and slab lifters are other stuff that can be utilized along with hook attachments. Slab lifters are specialized attachments that are meant for lifting various materials that are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools which attach to your forklift in order to make moving rolls of carpet a lot easier. The accessory connects onto the lift truck's blades and has a pole that goes through the middle of the carpet roll.

There are numerous other types of lift truck accessories which could be utilized for facility maintenance like for instance snow forks. These forks attach to front end loaders and can move materials like for example dirt, soil and snow. Other popular cleanup accessories consist of magnetic sweepers and standard sweepers. Standard sweepers comprise a broom which the lift truck forks hook onto for sweeping large spaces like warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths as much as sixty inches and this surface area makes clean up easy and quick.

A material spreader is one more forklift accessory which is usually used at facilities. These spreaders are useful for a range of applications like spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Another optional lifting accessory are work platforms. These could be used by several different businesses everyday. Platforms may differ in size from 36" x 36" to up to 60" x 60". Several models may be existing and are capable of folding up and storing into a smaller place. Work platforms are designed to raise personnel up to an overhead location with the use of the lift truck. Larger platform units have added space for employees so as to carry tools and other necessary stuff meant for the task. Normally work platforms are made of poly material or steel.
