

JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove started on a cross country RV voyage. After spending many years establishing his family built crane company with his brother, John had no idea that this trip would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

All through their trip, John reacquainted himself with past business connections along the way. In combination with these conversations and a significant event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a substantial market for a product that could quickly and securely lift individuals in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John formed a joint venture with two friends and obtained a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty workers, they built and sold the first JLG aerial work platform. The business incorporates some of the basic design essentials of that original lift into current versions.

JLG forklifts have come a long way since Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. These days, the business proudly continues to expand itself into many marketplaces globally and develops new products to ensure consumers are capable of being more efficient and perform in the workplace within a safer environment.
