This system permits Doosan Infracore America to aggressively compete in this competitive marketplace. The lift truck product line remarkably comprises of 63 different products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these numerous truck models range from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 certified facility.

Doosan Infracore America is the fastest developing forklift and lift truck company in the North American market, due to its exceptional level of product performance and their consistently high level of customer support and service given to all Doosan Infracore Forklift clients. The U.S. forklift division located in Cleveland has a professional team knowledgeable in Sales, Purchasing, Marketing, Logistical and Technical Support.

Originally the home-based lift truck market in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled forklifts as part of a home-based equipment expansion venture. Product sales of these products were originally targeted to state-run companies, large scale organizations, and the armed forces. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical instruction grew to become the new focus for enhancing quality and product development.

Domestic forklift trade for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's progressive technological improvements combined with sales success placed them in a situation of considerable expansion of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to help them in the very competitive North American materials handling industry. This project proved highly lucrative for Daewoo and their forklift product sales expanded greatly. In 1984, the company finished development of a new facility to help in producing high end value-added products for export. In 1993, the corporation had a global sales network and started exporting designs they had established through in-house expertise, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into international marketplaces.
